World Horticultural Trade and U.S. Export Opportunities

U.S. Exports of Horticultural Products Almost Keeping Pace with Last Year

10/10/99 P 11:40
10/10/99 P 11:40

U.S. exports of horticultural products in fiscal year (FY) 1999 to date (October-January) are valued at \$3.5 billion, down slightly more than 1 percent from the same time period a year ago. Reduced sales of tree nuts and fresh citrus account for the decline. The value of tree nut exports to date in FY 1999 totaled \$502.1 million, down 9 percent from the previous year. Fresh citrus exports (all oranges) are down 12 percent from a year ago, valued at \$185.8 million during October-January 1998/99.

Japan's economic recession; the strong U.S. dollar; and the weakness in other Asian markets are continuing to hamper U.S. exports. Lower exports to Asia are being partially offset by expanded sales to the rest of the world. Exports to date to Asian markets are down 7 percent or \$74.2 million. However, exports to date to Japan are showing some recovery, after 3 straight years of declines, as sales to date are valued at \$529.8 million, up 1 percent from a year ago. Exports to other Asian markets, though, are down 14 percent or \$79.4 million. Reduced sales to Thailand, Malaysia, Indonesia, Philippines, Korea and Hong Kong account for this decrease. Sales to the rest of the world to date are up 1 percent or \$23.8 million. Mexico leads the export gains to the rest of the world, with U.S. sales to date to that country up 23 percent or \$42.5 million. Exports are also up to the European Union, the second largest U.S. market, and are recovering to Brazil. Canada, the largest U.S. market, has slowed its growth this year, as sales to date are up only marginally.

Export Summary

U.S. exports of horticultural products to all countries in January totaled \$769 million, up 1 percent from the same month a year earlier. Eight out of 15 categories registered increases. Categories with the most significant increases in January were non-citrus fresh fruit (up \$13.6 million or 26 percent); fruit and vegetable juices (up \$10.2 million or 25 percent); dried fruit (up \$7.7 million or 29 percent) and wine (up \$7.2 million or 26 percent). The categories with the most significant decreases were fresh citrus (down \$10.9 million or 17 percent) and canned vegetables (down \$8.3 million or 15 percent). For FY 1999 to date (October-January), the total value of U.S. horticultural exports was \$3.53 billion -- 1 percent below FY 1998 during the same time period.

All measures not otherwise noted are metric. One kilogram (kg.)=2.2046 pounds,
1 metric ton = 2,204.62 pounds, 1 liter = 0.2642 gallon,
1 hectoliter (hl.) = 26.42 gallons, and 1 hectare (ha.) = 2.471 acres.

Export News and Opportunities

Export Credit Guarantee Program: USDA Increases Operational Credit Guarantees for Mexico GSM-102

The U.S. Department of Agriculture has increased by \$500 million the amount of operational credit guarantees available for sales of U.S. agricultural commodities to Mexico under the Commodity Credit Corporation's Export Credit Guarantee Program (GSM-102) for fiscal year 1999. The total fiscal year 1999 authorization for coverage to Mexico under GSM-102 remains unchanged at \$1.25 billion and is now fully allocated.

Exporters may apply for credit guarantees for the Mexico GSM-102 program, on a first-come, first-served basis to cover sales of any of the commodities specified in the GSM list published in FAS announcement PR 0434-98, issued September 8, 1998, or as superseded. The following horticultural products are eligible under the export credit guarantee programs for FY 1999: dried fruit; fresh fruit; 100 percent fruit juices; fruit and vegetable concentrates, pastes, pulps and purees; honey; hops or hops extract; tree nuts canned vegetables; dried vegetables; wine; and brandy.

The Export Credit Guarantee Program (GSM-102 program) makes available financing for the sales of U.S. agricultural commodities overseas. USDA does not provide financing, but guarantees payments due from foreign banks. USDA typically guarantees 98 percent of the principal and a portion of the interest. The GSM-102 program covers credit terms from 90 days to 3 years.

Under the program, once a firm sale exists, the qualified U.S. exporter applies for a payment guarantee before the date of export. The U.S. exporter pays a fee calculated on the dollar amount guaranteed, based on a schedule of rates applicable to different lengths of credit periods. The CCC-approved foreign bank issues a dollar-denominated, irrevocable letter of credit in favor of the U.S. exporter, ordinarily advised or confirmed by the financial institution in the United States agreeing to extend credit to the foreign bank. The U.S. exporter may negotiate an arrangement to be paid as exports occur by assigning the U.S. financial institution the right to proceeds that may become payable under the guarantee, and later presenting required documents to that financial institution. Such documents normally include a copy of the export report.

If a foreign bank fails to make any payment as agreed, the exporter or the assignee may file a claim with USDA for the amounts due and covered by the guarantee. USDA will pay the U.S. bank and will take on the responsibility of collecting the overdue amount from the foreign bank.

The table on page 11 presents the FY 1999 GSM-102 programs for which USDA has authorized credit guarantees for sales of U.S. horticultural products as of March 25, 1999. Additional information about the GSM-102 program, regulations, country specific press releases and program announcements, and a Monthly Summary of Export Credit Guarantee Program Activity may be accessed on the Internet at:

<http://www.fas.usda.gov/excredits/exp-cred-guar.html>

Supplier Credit Guarantee Program: No Activity Since Last Publication

The Supplier Credit Guarantee Program (SCGP) is unique because it covers short-term financing extended directly by U.S. exporters to foreign buyers and requires that the importers sign a promissory note in case of default on the CCC-backed payment guarantee. The SCGP emphasizes high-value and value-added products, but may include commodities or products that also have been programmed under the GSM-102 program.

The table on page 12 presents the FY 1999 SCGPs for which USDA has authorized credit guarantees for sales of U.S. horticultural products as of March 25, 1999. Additional information about the SCGP, regulations, country specific press releases and program announcements, and a Monthly Summary of Export Credit Guarantee Program Activity may be accessed on the Internet at:

<http://www.fas.usda.gov/excredits/scgp.html>

Note: The GSM will consider requests to establish a SCGP and/or GSM Program for a country or region or amend an authorized program to include horticultural commodities and products which are currently not eligible.

(For further information on the SCGP or GSM-102 Program for horticultural commodities, contact Yvette Wedderburn Bomersheim, 202-720-0911).

World Trade Situation and Policy Updates

Mexico fills 1999 TRQ for U.S. potato chips and prepared/preserved potatoes

Mexico's Secretariat of Commerce and Industrial Development (SECOFI) has announced that the 1999 NAFTA tariff rate quota (TRQ) on potato chips and prepared or preserved potatoes (H.S. 2005.20.01) has been filled. The TRQ in effect for the current year is 6,260 metric tons. As a result, beginning March 3, and for the remainder of the year, imports of these products from the United States will be subject to the 20 percent tariff authorized under NAFTA. The U.S. potato industry has requested U.S. trade negotiators and Congress to press vigorously for the early elimination of Mexico's NAFTA TRQ and out-of-quota tariff for these products. According to Census Bureau data, U.S. potato chips exports to Mexico in 1997/98 totaled 11,000 tons, valued at \$19.3 million, up 30 percent in volume and 49 percent in value from the previous year. Exports for prepared or preserved potatoes for 1997/98 were 633 tons, valued at \$0.7 million, unchanged from the preceding year.

U.S. exports of essential oils declined in CY 1998

U.S. exports of essential oils in calendar year (CY) 1998 declined to \$529 million, a drop of 10 percent from 1997. Most of the reduction from year to year is attributed to Japan. U.S. exports of total essential oils to that country declined 55 percent from 1997 to \$47 million. Prior to 1998, Japan was the largest single market. In 1998, Japan dropped to third behind Canada and the United Kingdom. On the positive side, U.S. exports to Mexico, the fourth largest market, increased to \$43 million, finishing the year 14 percent ahead of last year. Essential oils are widely used in perfumery, cosmetic, pharmaceutical, food, and soft drink products. Mint oils are used in chewing gum, toothpaste, and mouthwashes, and in many confectionery and pharmaceutical products. The soft drink industry uses citrus oils on a large scale, and food processors rely on them to flavor confectionery and other products.

Taiwan removes import ban on Florida fruit, but initiates ban on Lake Elsinore in California

On March 15, 1999, Taiwan lifted the ban on imported fruit from six Florida counties. This ban had been in place since July 1998 due to Mediterranean fruit fly (Medfly) concerns. This action follows the deregulation of the same counties by the USDA. The Medfly has been shown to be eradicated from the counties of Dade, Highland, Hillsborough, Lake, Manatee and Marion in Florida and exports of fresh fruit to Taiwan from these counties now face the general export quarantine requirements.

However, Taiwan announced a new ban to go into effect March 18 for fruit from the Lake Elsinore area of Riverside County, California. The area includes the USDA Medfly quarantine zone, plus an additional 20 km buffer area. Establishment of this quarantine zone is a positive change from the previous Florida and California Medfly cases, where Taiwan banned fruit from the entire county, plus an additional 20 km buffer. The change in procedures is the result of negotiation and agreement by USDA and the Taiwan authorities.

New pesticide tolerance regulations go into effect in June 1999 in Taiwan

On February 10, 1999, the U.S. Government was notified that the Taiwan Bureau of Standard Metrology and Inspection (BSMI) will begin enforcing new pesticide tolerance standards in June 1999. After the new BSMI regulations go into effect, all fruit and vegetable imports will be subject to mandatory inspection for pesticide residues. Imports that fail to comply with Taiwan's tolerance levels will be rejected. Zero residue tolerance will be enforced for all pesticides for which no standards are in place by June 1999. Currently, imports of fruit and

vegetables are routinely sampled by the BSMI for pesticide residues, but the results of these tests have been used for reference only. U.S. producers for the Taiwan market who use pesticides for which official Taiwan tolerances have not been established will need to switch to pesticides for which Taiwan standards exist, or will need to request that the Taiwan Department of Health establish tolerances. U.S. fruit and vegetable exporters and producers are encouraged to work closely with their Taiwan importers when filing these requests in order to ensure conformity with all requirements and procedures.

For further information on the contact point in the Taiwan Department of Health for fruit and vegetable pesticide residue matters, a description of the information that is required by the Taiwan authorities to establish pesticide tolerance levels, or a list of residue tolerances that are currently approved by the Taiwan authorities, reference the full text at <http://www.FAS.USDA.GOV/http/circular/1999/99-04/taiwan.html>.

Mexico makes technical changes to rule making process

In Mexico's "*Diario Oficial*" (Federal Register) on January 15, the Mexican Department of Commerce (SECOFI) announced several technical changes to its rule making process. The most important change is that public comments on proposed rules and proposed changes to existing rules must be submitted in Spanish. Given the length and highly technical and legalistic nature of this announcement, interested parties with questions or concerns should submit them via fax or email to FAS/Mexico. The subject should reference the Mexican Federal Law of Metrology and Standardization.

Email: AgMexico@fas.usda.gov

Japan to require place of origin labeling on all fresh fruit and vegetable imports

Japan's Ministry of Agriculture, Forestry, and Fisheries (MAFF) announced in early March plans to expand its place of origin labeling (POL) requirements to include all fresh fruits and vegetables. Under the plan, retailers will be required to display place of origin on the targeted products beginning Japanese fiscal year 2000, which begins April 1, 2000. MAFF officials noted that expanded POL requirements are necessitated in lieu of rising food imports and an expansion of the number of overseas suppliers exporting to Japan. Moreover, the new regulations are intended to improve information provided to customers at the point of sale. The new POL requirements will apply to domestic produce as well as imported. MAFF's POL plan requires presentation of place of origin at the retail level and includes fruits and vegetables without packages, in which case retailers must place cards indicating the origin of the product. Current MAFF POL requirements are limited to nine vegetables where imports account for a significant share of total consumption (including broccoli, asparagus, and Chinese vegetables).

Organic Updates

Danish Government support for organics to continue

In early February, Denmark's Minister of Food, Agriculture and Fisheries announced Action Plan II that will continue support for the Danish organic sector into the 21st century. Proposed funding of DKK 2.2 billion (US\$338 million) for 1999-2003, will cover both production and marketing.

The action plan calls for 10% of Danish farmers to be using organic production methods by 2003, and will result in a tripling of Danish organic production over 5 years. In 1998, there were approximately 2,500 farms using or converting to organic farming methods, a two-fold increase since 1996, and about 99,000 hectares (245,000 acres) or 3.7% of Danish agricultural area devoted to organic production. For 1999, as farms and acreage in transition go fully organic, the numbers are expected to climb to 3,300 farms and 150,000 hectares (371,000 acres).

Denmark's main organic products are dairy, meat, eggs, vegetables and grains. Approximately 20% of the milk produced in Denmark is organic. The average organic farm size is 38.5 hectares (95 acres), which is roughly equivalent to the size of a conventional Danish farm.

The action plan also will focus on strengthening exports to neighboring countries, especially the UK, Germany, Sweden and the Netherlands; improving the quality of organic products; and centralizing distribution especially for the hotel and restaurant sector. The plan calls for establishment of organic distribution centers around the country to facilitate the sale and delivery of a wide range of organic food products in commercial quantities. The new support program is in addition to an already-established government support scheme which covers half of the cost of research and development associated with new product development. Projects such as market studies and new product development which will be funded under the \$30 million action plan are intended to eventually be self-financing.

For more news on organics, see HTP's monthly newsletter "Organic Perspectives," available at the HTP home page: <http://www.fas.usda.gov/htp/organics/organics.html>

The newsletter contains reports on organics from around the world gleaned from attache reports, trips made by HTP's organics staff, and other sources. The newsletter also covers items of interest about the U.S. national organic program and the domestic organic industry. A list of upcoming conferences, trade shows and other events is included in every issue.

(For further information, contact Janise Zygmunt (analysis) at 202-720-1176 or Kelly Strzelecki (marketing) at 202-690-1341.)

World Pear Situation

Pear production in selected countries in 1998/99 is forecast at 12.6 million metric tons, up 7 percent from the 1997/98 output. The upturn mainly reflects a sharp increase in pear production in major producing countries, especially in Italy and China. On the other hand, selected countries' pear exports in 1998/99 are forecast 1 percent below the previous season's shipments. Reduced exports from the United States and Spain will likely more than offset higher exports from China and Italy. The 1998/99 U.S. pear export forecast has been reduced 13 percent to 135,000 tons, down 18 percent from last season's record shipments. Smaller production in major U.S. pear exporting states (Washington, California, and Oregon); the related increase in U.S. prices; improved supplies from the EU; and economic difficulties facing principal U.S. markets, such as Brazil, have slowed U.S. pear exports in 1998/99. Washington, California, and Oregon normally account for more than 95 percent of U.S. pear production and exports. U.S. principal pear customers are Canada, Mexico, and Brazil, in that order.

Northern Hemisphere

Increased pear *production* in the Northern Hemisphere in 1998/99 mainly reflects larger crops in **China**, the world's leading pear producing country, and **Italy**, the principal producer in the European Union (EU). Good weather across China's deciduous fruit growing areas (Shandong, Shaanxi, Henan, and Liaoning provinces) is expected to boost Chinese pear production in 1998/99. Italy's 1998/99 pear crop is forecast to increase more than 60 percent from the 1997/98 weather-reduced crop. On the other hand, pear production in the **United States** in 1998/99 is forecast to decrease 11 percent from the 1997/98 output. Smaller pear crops are forecast in the states of Washington, California, and Oregon, due partly to cool, wet weather during bloom and pollination. Washington, California, and Oregon account for more than 95 percent of total U.S. pear production.

Northern Hemisphere pear *exports* in 1998/99 are forecast at 900,580 tons, down 2 percent from the previous season's shipments. Increased exportable supplies from **China** and **Italy** will likely be offset by lower shipments from the **United States**. Italy's pear exports are forecast to recover to about 170,000 tons in 1998/99. Italian pear shipments declined significantly last season as exportable supplies were hampered by a smaller crop. China's pear exports in 1998/99 are forecast to increase to 130,000 tons, the result of a larger crop. On the other hand, U.S. pear shipments in 1998/99 are now forecast at 135,000 tons, down 18 percent from the record 165,000 tons shipped in 1997/98. Reduced production in the states of Washington, California, and Oregon, major U.S. pear exporting states, the related increase in U.S. pear prices, improved production prospects in the EU, and the economic problems facing some U.S. principal markets, such as Brazil, will slow U.S. pear exports in 1998/99. Italy, the United States, and China combined will account for about half of Northern Hemisphere pear exports in 1998/99.

Southern Hemisphere

Pear **production** in the Southern Hemisphere for the 1998/99 season (crop harvested in early-1999) is projected at 1.3 million tons, slightly higher (3 percent) than the 1997/98 output. **Argentina's** pear production, the largest in the Southern Hemisphere, in 1998/99 is forecast at 536,550 tons, unchanged from last season's output. More than half of the Argentine pear crop is exported fresh and the remainder is consumed fresh in the domestic market (25 percent) and processed into juice or canning (the remaining 25 percent). **Chilean** pear production in 1998/99 is forecast at 258,500 tons, also unchanged from last season's crop.

Pear **exports** from Southern Hemisphere countries in 1998/99 are forecast at 605,000 tons, unchanged from 1997/98 shipments. Exports from **Argentina**, the leading exporter in the Southern Hemisphere, are forecast to decrease slightly to 300,000 tons. The Argentine fresh pear marketing season is year round with the bulk marketed February through April. Major customers are Brazil, the EU, and the United States.

Pear exports from **Chile**, the second largest supplier in the Southern Hemisphere, are also forecast to decrease slightly in 1998/99 to 150,000 tons. The EU is Chile's largest export market, followed by the United States. During the last few years, sales to the Far East and Latin American markets have showed significant growth. Although there is no mandatory quality control program for pears, most producers have agreed to join voluntary quality control programs to increase average export prices and avoid the negative economic returns of the past.

(For further information on production and trade, contact Samuel Rosa at 202-720-6086. For information on marketing, contact Sonia Jimenez at 202-720-0898)

U.S. Pear Exports Reach Record \$90 Million in 1997/98

*NOTE: Exports as a percentage of production is based on pear production for fresh use only.

GRAND TOTAL

FAS PUBLICATIONS

The publications listed below present timely and reliable information on U.S. and world production, supply and demand, and trade for many different commodities. All these publications can be subscribed to through the National Technical Information Service (NTIS) of the U.S. Department of Commerce. To order, call NTIS at 1-800-999-6779, (703) 605-6060, or (703) 605-6043 for TDD (hearing impaired only). A subscription form is provided on the other side.

Tropical Products: World Markets and Trade

Issued four times a year. Provides information on the world production and supply and demand situation for coffee and cocoa. Presents U.S. trade data on spices and essential oils.

Cotton: World Markets and Trade

Monthly report provides statistics and other information on U.S. and world production, supply and demand, and trade for cotton. Covers crop conditions, the latest trade policy developments, and export market information.

Dairy, Livestock and Poultry: U.S. Trade and Prospects

Quarterly report provides U.S. trade information and analyses of the trade of dairy, livestock, and poultry products.

Dairy Monthly Imports

Monthly report of imports of cheese and other quota dairy products subject to licensing, as well as imports under the quota not subject to licensing.

Livestock and Poultry: World Markets and Trade

Semi-annual publication provides information on U.S. and world production, use and trade of livestock and poultry products, trade policy developments, and export market information.

Dairy: World Markets and Trade

Semi-annual publication provides information on U.S. and world production, use and trade of dairy products, trade policy developments, and export market information.

Grain: World Markets and Trade

Monthly publication provides information on U.S. and world production, supply and demand, and trade for a variety of grains. Covers crop estimates, the latest trade policy developments, and export market information.

World Horticultural Trade and U.S. Export Opportunities

Monthly publication provides information on the world situation and outlook for horticultural products. Covers export competition, foreign market import potential, and export opportunities for U.S. horticultural products.

Oilseeds: World Markets and Trade

Monthly publication provides data and analyses on U.S. and world production, supply, use, and trade of a variety of oilseeds and products. Covers production estimates, latest trade policy, commodity prices, and export market information.

Sugar: World Markets and Trade

Semi-annual publication provides information on the world production and supply and demand situation for sugar. Includes in-depth special country features. The November issue also presents the honey situation and outlook in selected countries.

Tobacco: World Markets and Trade

Monthly report provides information on U.S. and world production, supply and demand, and trade for tobacco. Covers crop estimates, the latest trade policy developments, and export market information. The March issue contains complete U.S. tobacco trade data for the preceding calendar year.

World Agricultural Production

Monthly report provides information on U.S. and world production of major agricultural products, including crop, livestock, and forestry estimates, weather and production briefs, and special articles of interest to the trade.

Wood Products:

International Trade and Foreign Markets

Issued five times a year. Provides information on the production, trade, and supply and demand situation in countries around the world for wood products. Highlights the latest trade policy developments, export statistics, and market information of interest to U.S. exporters.

Monthly Summary of Export

Credit Guarantee Program Activity

Monthly summary report shows fiscal year commitment figures for the Commodity Credit Corporation's Export Credit Guarantee Program (GSM-102) and Intermediate Credit Guarantee Program (GSM-103).

U.S. Export Sales

Weekly report based on reports submitted by private exporters. Outstanding export sales as reported and compiled with other data give a snapshot view of the current contracting scene. All countries with outstanding sales or accumulated exports are included for each class of wheat, all wheat, wheat products, corn, soybeans, soybean cake and meal, American pima cotton, all upland cotton, whole cattle hides, and wet blues.

AgExporter Magazine

Monthly magazine for businesses selling farm products overseas provides tips on exporting, descriptions of markets with the greatest sales potential, and information on export assistance available from the U.S. Department of Agriculture. The audience is U.S. agricultural producers, exporters, trade organizations, state departments of agriculture, and any other export-oriented organization.

Food and Agriculture Directory

Directory features up-to-date listings of federal and state agencies, trade associations and a host of other organizations that can help you penetrate foreign markets. Includes phone and fax numbers.

Summaries and selected tables from many Foreign Agricultural Service world market and trade reports are available electronically. The reports include U.S. Export Sales (available electronically after 8:30 a.m. on release day); Grain: World Markets and Trade; Oilseeds: World Markets and Trade; Cotton: World Markets and Trade; Tobacco: World Markets and Trade; World Agricultural Production; the early release version of World Horticultural Products and U.S. Export Opportunities; and Tropical Products: World Markets and Trade (all available electronically after 3:00 p.m. Washington DC time on release day) as well as Sugar: World Markets and Trade; Livestock and Poultry: World Markets and Trade; Dairy: World Markets and Trade, and U.S. Planting Seed Trade (available within a week after release.)

You can read the reports on the FAS home page (<http://www.fas.usda.gov>). The reports remain "current" until the succeeding issue is available. Older issues are available in the archives section of the home page. We also make selected cover articles and graphics available from these publications, in a separate section of the site. Reports are also available from the Economic Bulletin Board at Stat-USA, on the same schedule. For more information, you may contact Stat-USA at (202) 482-1986 (Monday-Friday, 8:30-5:30 p.m. Washington, DC time.)

For more information on the FAS home page, contact Glenn Kaup, tel. (202) 720-3329; fax. (202) 720-3229; or via e-mail kaup@fas.usda.gov

The U.S. Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer."
